

ACIDIC BATHTUB AND TILE CLEANER – POWERFUL LIMESCALE AND SOAP SCUM REMOVER

Product Description

Acidic Bathtub and Tile Cleaner is a professional acid-based cleaning solution developed for the removal of limescale, soap scum, water stains, and mineral deposits from bathroom surfaces. It is designed to provide fast and effective cleaning in areas exposed to hard water buildup and regular moisture contact. The formula helps dissolve inorganic residues and restore a cleaner, brighter appearance on treated surfaces. It is suitable for intensive bathroom maintenance in both commercial and professional cleaning environments.

Intended Use

The product is intended for routine and intensive cleaning of bathroom surfaces affected by limescale, soap scum, mineral buildup, and water-related stains. It is suitable for professional and industrial use where strong descaling and bathroom surface cleaning performance are required. It is designed for use on acid-compatible washable bathroom surfaces.

Application Areas

The product may be used on bathtubs, ceramic tiles, grout lines, shower cabins, glass partitions, washbasin areas, faucet surroundings, bathroom floors, and bathroom walls. It is suitable for hotels, gyms, residential complexes, commercial bathrooms, public facilities, and other hygiene-critical wet areas requiring regular descaling and mineral residue removal.

Product Advantages

The product provides strong acidic cleaning performance against limescale, soap scum, and mineral deposits commonly formed on bathroom surfaces. It is especially effective in areas affected by hard water residue and helps restore a cleaner and shinier surface appearance after use. Regular application may help reduce dullness and simplify ongoing bathroom maintenance. The formulation is suitable for intensive professional use in high-demand cleaning environments.

Directions for Use

Apply the product directly onto the affected surface or onto a suitable cleaning sponge or cloth depending on the application area. Allow a short contact time so the product can loosen limescale, soap scum, and mineral residues. Wipe or scrub as needed, then rinse thoroughly with clean water. Repeat the application where necessary for heavier buildup. Do not allow the product to dry on the surface during use. Always test first on a small inconspicuous area before full application on sensitive or specialty finishes.

ACIDIC BATHTUB AND TILE CLEANER – POWERFUL LIMESCALE AND SOAP SCUM REMOVER

Packing

Available in a range of packaging options from 500 ml up to 20 L, depending on customer preference, product type, and filling requirements. Custom packaging, private label, private label manufacturing, contract filling, and full branding support are available upon request for wholesale, industrial, and professional distribution needs.

Storage Conditions

Store in the original, tightly closed container in a cool, dry, and well-ventilated place. Protect from direct sunlight, frost, and excessive heat. Keep the container securely closed when not in use.

Safety Information

This product is intended for professional use only. Due to its acidic nature, avoid contact with skin, eyes, and clothing. Use suitable protective gloves and eye protection during handling and application. Do not mix with bleach, alkaline products, or incompatible cleaning chemicals. Keep out of reach of children and unauthorized persons. Refer to the Safety Data Sheet (SDS) for detailed information on hazards, first aid measures, handling, storage, and disposal.

General Information

The information provided in this Technical Data Sheet is based on current knowledge and practical experience. It is intended as a general guideline for product application, handling, and storage, and does not constitute a guarantee of performance under all conditions of use.
