

ANTI-FOG GLASSES LENS SPRAY

Anti-Fog Glasses Lens Spray is a practical and portable lens care product developed to help prevent fog formation and maintain clear vision on eyewear surfaces. It is intended for daily use in situations where lenses are exposed to humid air, mask use, perspiration during sports, or rapid temperature changes. The formulation supports clear, uninterrupted visibility while also helping clean the lens surface without scratching when used as directed. Its compact spray format makes it suitable for personal, travel, sports, and workplace use.

INTENDED USE

This product is intended to reduce fogging on glasses and protective lens surfaces while supporting routine lens cleaning. It is suitable for optical glasses, sunglasses, swimming goggles, ski goggles, and industrial protective eyewear. It is designed for users who require clearer vision during daily activities, sports, outdoor work, or mask use.

APPLICATION AREAS

Optical glasses, sunglasses, swimming goggles, ski goggles, sports eyewear, industrial protective glasses, face protection lenses, daily personal eyewear care, outdoor and winter activity equipment.

ADVANTAGES

Helps prevent fog formation on lens surfaces for clearer vision. Provides a long-lasting anti-fog effect after a single application under normal use conditions. Suitable for a wide range of eyewear types. Easy to apply with a practical spray nozzle for quick and even coverage. Lens-friendly formula that does not scratch when used with a soft microfiber cloth. Leaves no heavy residue after proper application.

DIRECTIONS FOR USE

First clean the lenses with a clean and dry cloth. Spray the product evenly onto both sides of the lens surface. Gently polish the lenses with a soft microfiber cloth until the surface is clear and evenly coated. Do not allow the treated lenses to come into contact with water immediately after application. Reapply as needed depending on environmental conditions and frequency of use.
