

ANTI SPLASH TOILET POWDER

PRODUCT DESCRIPTION

Anti Splash Toilet Powder is a single-dose toilet bowl care powder designed to help reduce splash-back during flushing by forming a temporary cushioning and mild foaming/effervescent layer in the bowl water. It also supports odor control and routine cleaning by helping loosen residues and refresh the bowl.

INTENDED USE

To reduce splash-back during flushing, support odor control, and provide routine toilet bowl cleaning and refreshment.

APPLICATION AREAS

Toilet bowl (ceramic / glazed porcelain), bowl water area, inner ceramic surface, under-rim area (with brushing). Suitable for routine maintenance in residential and commercial restrooms.

ADVANTAGES

Helps reduce splash-back during flushing.
Supports odor control through cleaning and buffering action.
Helps loosen residues and refresh the bowl.
Single-dose sachet supports easy dosing and hygienic handling.
Water-activated effervescence supports contact and coverage.

DIRECTIONS FOR USE

Pour the full content of 1 sachet (37 g) directly into the toilet bowl water. Wait 2–5 minutes for activation. Brush if needed, especially under the rim. Flush to rinse. For heavier soils or stronger effect, extend contact time up to 10 minutes and brush before flushing. Do not mix with bleach/chlorine products or strong acids.

COMPOSITION

Proprietary blend of organic acid(s), alkaline builders (carbonate/bicarbonate system), anionic surfactant (powder form), and processing aids.

PHYSICAL AND CHEMICAL PROPERTIES

Form: Powder
Color: White / off-white
Odor: Mild / Flower
Solubility: Partially to fully soluble in water (formulation dependent)
pH (1% solution): 6-7
Relative density: Not determined

PACKAGING INFORMATION

Net weight: 37 g
Packaging type: Single-dose sachet
Secondary packaging: Carton / master carton (available upon request)
