

ANTI SPLASH POWDER – FOAMING WC COMFORT POWDER 37 G SACHET

Anti Splash Toilet Powder is a water-activated foaming powder for toilet bowl use. When poured into the bowl water, it begins to form foam within seconds. The foam spreads across the water surface to create a cushioning barrier that helps reduce splash-back and noise during use. The product has a mild floral fragrance, helps reduce unpleasant odours and supports routine cleaning of the toilet bowl.

INTENDED USE

Pour the product into the toilet bowl water before using the toilet. The resulting foam layer helps reduce splash-back, noise and odours during use. The formula also helps refresh and clean the bowl when flushed after use.

DIRECTIONS FOR USE

1. Open one 37 g sachet and pour its entire contents directly into the toilet bowl water.
2. Foam begins forming within seconds. Allow it to spread across the water surface.
3. Use the toilet as usual, then flush.

No mixing or 2–5 minute waiting period is required. Do not mix with bleach, chlorine products or strong acids.

APPLICATION AREAS

Suitable for residential bathrooms and commercial restrooms, including offices, hotels and hospitality facilities.

KEY BENEFITS

- Creates a foam barrier over the toilet bowl water.
- Helps reduce splash-back and noise during use.
- Helps reduce unpleasant odours.
- Provides a mild floral fragrance.
- Helps refresh and clean the toilet bowl.
- Single-use sachet supports convenient and hygienic handling.
