

GRANITE SURFACE CLEANER – pH NEUTRAL, NON-DAMAGING

Product Description

Granite Surface Cleaner is a professionally developed pH-neutral cleaning solution designed for granite and other acid-sensitive stone surfaces. It helps remove daily dirt, fingerprints, light grease, water marks, and routine surface residues without dulling, etching, or weakening the stone surface. Unlike acidic or highly alkaline cleaners that may damage natural stone, this formula supports safe and regular maintenance while helping preserve the natural polish, texture, and color of granite. Its pleasant and long-lasting fragrance enhances the feeling of cleanliness in premium residential and commercial spaces.

Intended Use

The product is intended for routine cleaning and maintenance of granite and other acid-sensitive natural stone surfaces. It is suitable for users seeking a non-damaging and pH-neutral cleaner for daily or frequent use on polished, sealed, and decorative stone installations. It is designed for manual and spray-based cleaning applications where surface protection and visual cleanliness are equally important.

Application Areas

The product may be used on granite countertops, worktops, polished and sealed granite floors, kitchen islands, preparation areas, bathroom granite surfaces, and other acid-sensitive natural stone surfaces. It is suitable for residential kitchens and bathrooms as well as hotel, office, showroom, and premium commercial stone installations.

Product Advantages

The product provides effective daily cleaning without the aggressive action associated with acidic or highly alkaline cleaners. Its pH-neutral formulation helps protect the natural surface character of granite and similar stone materials while maintaining their shine, color, and texture. It removes light grease, dust, fingerprints, and water marks without leaving visible streaks or residue when used as directed. The formula is suitable for frequent use and does not adversely affect commonly used sealants on granite surfaces. Its long-lasting fragrance also supports a fresher and more refined cleaning experience.

Directions for Use

Apply the product directly onto the surface or onto a soft clean cloth depending on the cleaning area. Wipe evenly across the stone surface until dirt and residues are removed. For larger areas, repeat as necessary with a clean microfiber cloth or suitable cleaning pad. No heavy scrubbing is normally required under routine use conditions. For best results, test first on a small inconspicuous area before full application, especially on specialty finishes or newly sealed surfaces.

GRANITE SURFACE CLEANER – pH NEUTRAL, NON-DAMAGING

Packing

Available in a range of packaging options from 500 ml up to 20 L, depending on customer preference, product type, and filling requirements. Custom packaging, private label, private label manufacturing, contract filling, and full branding support are available upon request for wholesale, retail, and professional distribution needs.

Storage Conditions

Store in the original, tightly closed container in a cool, dry, and well-ventilated place. Protect from direct sunlight, frost, and excessive heat. Keep the container securely closed when not in use.

Safety Information

Use the product only as directed. Avoid contact with eyes. Keep out of reach of children and unauthorized persons. Do not mix with other cleaning chemicals unless compatibility has been confirmed. Although the formula is designed for stone-safe cleaning, it should always be used according to surface suitability and good cleaning practice. Refer to the Safety Data Sheet (SDS) for detailed information on safe handling, storage, first aid measures, and disposal.

General Information

The information provided in this Technical Data Sheet is based on current knowledge and practical experience. It is intended as a general guideline for product application, handling, and storage, and does not constitute a guarantee of performance under all conditions of use.
